Dropship order processing options

Below we have set out the 3 order processing options that are available to trade customers when placing product orders.

1.

Manually place orders

Log into your account and manually place individual orders for **dropshipping** to your customers or **bulk** orders to be sent to yourself.

Ideal for those customers placing just **one or two dropship orders per day**.

2.

Upload multiple orders

Use our **Multi-Channel Order Import System (MCOIS)** to upload multiple **dropship orders** from any sales channel using a .csv file.

We supply **FREE** desktop software for download, to help you convert your eBay, Amazon, Shopify and other cart orders into the right format for uploading to our MCOIS.

Ideal for busy dropshippers placing in excess of **8-10 orders per day**.

3.

Integrated orders API

If you have a **Wordpress Woocommerce** website or a **Shopify** website, you can use our handy API to transfer **dropship orders** directly from your website.

This is the quickest and easiest method of processing **multiple orders daily**.

If you do not yet have a website and would like us to build one for you, **we can help!**
